

Quicker and cheaper translations - with CAOBISCO Online-EDS

- You would like to create package declarations in a number of languages.
- But which is the most efficient method?
- Laborious searches in dictionaries or vocabulary lists?
- Or hiring a multitude of translators?
- Save yourself the time, energy and high translation costs!

With the new internet based declaration labelling dictionary, Online-EDS, you can create your declarations and have them simultaneously translated in many languages at the touch of a button.

In Online-EDS you can find a basic vocabulary of around 3,000 terms, specifically related to foodstuffs and confectionery, e.g. trade names, additives (with E codes), ingredients and much more.

These terms can be translated into 22 different languages (Dictionary function)

Translation will be carried out automatically at the push of a button: Online-EDS is simple to use

You can create specific declaration labelling information for all your products (Edit function) and have them automatically translated.

This labelling declaration can be saved in Online-EDS for future use at anytime or it can be changed

You can download the translated labelling texts to be further processed in other programs or you can send them by e-mail, e.g. to an agency or to the printers.

You can complement the existing vocabulary of approx. 3,000 words by adding terms specific to different companies.

You do not need to install expensive software - simply log on to the internet based Online-EDS system.

You only need a normal PC which is supported by Unicode and has access to the Internet.

In order to use the Online-EDS, including all 22 languages, you pay a one-off basic license fee, and then a yearly user fee from the second year of usage.

Online-EDS edits package declarations and translates for you from and into the following languages:

Albanian, Czech, Danish, Dutch, English, Estonian, Finnish, French, German, Greek, Hungarian, Italian, Latvian, Lithuanian, Norwegian, Polish, Portuguese, Romanian, Russian, Serbian, Spanish, Swedish

Technical Requirements: Internet connection
PC supported by UNICODE
